

TRITON
VALVES LTD

Challenging Excellence

October 2014

TESTIMONIAL

We selected Besten Engineers & Consultants India Pvt. Ltd as our architects, engineering consultants and project management consultants in 2009. Our project had a fair degree of complexity since it involved complete redesign of the master layout and streamlining of our manufacturing facilities.

The Besten team led by their Senior Consultant Mr. Rajagopal Pai impressed us from the very beginning with their meticulous attention to detail in every aspect of design. They were quick in mobilizing, generous with their time, very competent in design and were able to get their proposal approved in record time.

Their tenders were extremely well drafted which empowered the project team to complete the project in a timely as well as cost effective manner. Mr. Pai's knowledge, passion for perfection and endless reserves of energy resulted in our project getting completed on time and all project objectives being met.

I would highly recommend Besten as one of the best engineering and consulting companies that we have worked with. Their passion and commitment to customer satisfaction is a benchmark and a model for consulting companies in India.

They have raised the bar very high. Our project team also learned many critical and practical ideas from them which we still apply in our Company.

We sincerely wish the Besten team every success in their future endeavours, we are extremely proud of this passionate and game-changing Indian Company.

For Triton Valves Ltd.
